

CUSTOMER ENGAGEMENT INTELLIGENCE, ON TOP OF YOUR EXISTING SYSTEMS

The promise was made on the phone.
It wasn't recorded in LeadSquared.

— *SvargAI connects the two and finds the missed follow-up.*

SvargAI works on top of your existing systems to connect customer signals across LeadSquared, phone conversations and other selected systems — helping your team find follow-ups and opportunities that need attention.

ONE REAL SITUATION

Two systems · one missed next step

01 · PHONE CALL · 12 SEPT

Rahul asked about the 12-session package.

Representative said

"I'll check and get back to you."

02 · LEADSQUARED

Nothing logged against Rahul since.

No follow-up is recorded.

↓ SVARGAI CONNECTS THE TWO SIGNALS ↓

● 03 · SVARGAI FINDS

PROMISE NOT KEPT

Rahul was promised a call back 3 weeks ago, but nothing followed.

WHY IT MATTERS

Rahul showed clear interest, but the next step was missed.

SUGGESTED ACTION

Follow up with Rahul and update the opportunity.

One signal came from the phone.

One signal came from
LeadSquared.

SvargAI connected them.

What SvargAI can look for

CUSTOMER ENGAGEMENT

Customer has gone quiet
Engagement is declining
Customer stopped responding
Customer stopped coming

FOLLOW-UP & GROWTH

Promise not kept
Enquiry not followed up
Customer showed upgrade interest
Opportunity has no recent meaningful activity

The exact checks can be selected based on the way your team works.

How it works

- 01 **Connect** — LeadSquared and selected customer interaction data.
- 02 **Watch** — AI agents continuously look for important signals.
- 03 **Connect the dots** — signals from different systems are brought together.
- 04 **Find what needs attention** — what happened, why it matters and what to review.

Your team makes the final decision.

NOT ANOTHER CRM

LeadSquared records what happened.
SvargAI looks for what needs attention.

LeadSquared continues to be your system of record. SvargAI does not replace it or ask your team to maintain another CRM.

A PRACTICAL STARTING POINT

Start with a small set of relevant checks using LeadSquared + selected customer interactions. Review what SvargAI finds with your team and expand from there.
