

KEEP THE CUSTOMERS YOU ALREADY HAVE

Your customers show you before they leave. Most businesses notice after.

— SvargAI finds them, and tells your team what to do next.

For clinics, wellness centres, gyms, salons and spas. SvargAI reads the systems you already use — bookings, packages, your CRM, phone and WhatsApp — and raises the customers who are starting to drift away, while there is still time to bring them back.

WHAT A WELLNESS CENTRE IN BENGALURU SHARED

01 · WHAT THEY FOUND

Around 20 appointments a month were being recorded as “No Show”.

In the booking system, every one of them looks the same.

RETENTION

The signals were in their records. Nobody was watching them.

02 · THE QUESTION IT RAISES

Which of those customers are simply missing an appointment — and which are starting to disengage?

The answer may already be in their booking, CRM and customer conversations. It isn't connected.

ABOUT TO DROP OFF

ONE CUSTOMER, AS SVARGAI SHOWS IT

An example

Meera Iyer RETENTION

FOUND

Came every week for three months. Then two No Shows in a row.

WHY IT MATTERS

Not just a missed appointment — the pattern of someone drifting away.

NEXT STEP

Call her this week and offer a time to come back.

ACT

A message is drafted. Your team sends it and marks what they did.

DID IT WORK

Checked on every run: a new booking that she attends.

What SvargAI looks for

DRIFTING AWAY

Customer stopped coming
Customer has gone quiet

AT RENEWAL

Package or plan ending soon
Something they bought about to expire

WARNING SIGNS

Missed appointments
Repeat complaints

The checks are chosen with you, from the systems you connect.

How it works

- 01 **Connect** — your booking or clinic system, CRM, phone and WhatsApp.
- 02 **Detect** — checks run on your own records, daily or hourly.
- 03 **Explain** — for each customer: what was found, why it matters, the next step.
- 04 **Act and measure** — your team acts; SvargAI checks whether it worked.

SvargAI never contacts a customer. Your team decides.

NOT ANOTHER SYSTEM TO RUN

Your booking system records what happened.
SvargAI looks for who needs attention.

It stays your system of record. SvargAI does not replace it or ask your team to keep another one up to date.

A PRACTICAL STARTING POINT

Connect one or two systems you already use. Run a small set of checks on your own records for thirty days, and review the customers SvargAI raises with your team before going further.
